Panasonic

ZENGINEERED

\zen-juh-neer\ *verb*

To artfully blend ancient ideas of meditation and intuition with unsurpassed state of the art technology

Engineering is the heart and soul of our massage chairs.

For almost a century, Panasonic has developed highly-regarded consumer and industrial products that marry innovative technology with thoughtful design.

Delicate enough to caress, powerful enough to provide deep therapy, and soothing enough to promote relaxation, every part of Panasonic massage chairs have been thoughtfully engineered. The combination of advanced technology and expert craftsmanship produces satisfying results for even the most discerning individuals.

This is Zengineering.

REAL PRO ULTRA™

Panasonic's Real Pro Ultra back massage mechanism is Zengineered to deliver a lifelike massage that simulates the movement, touch, and warmth of human hands. Our engineers and massage experts worked together to imagine and build a precise, effective mechanism.

Refined, intuitive, and thoughtful, the Real Pro Ultra is your at-home, on-call massage therapist.

By combining body profile scanning with pressure sensing massage rollers, Real Pro Ultra delivers a tailored massage with intensity focused directly on acupressure points.

It's delicate enough to caress. It's powerful enough to fully mobilize every level of your spine from your neck to your low back. It's our Real Pro Ultra: the engine that drives the MA73 massage chair.

“I was looking for a massage chair that gave a deep massage especially in the neck and the lower back, and the MA73 was definitely the answer. The roller hits all the right spots, and the manual mode allows you to pinpoint different areas on your back.”

“Just received this amazing
massage chair last week.
It is truly an amazing chair.”

A LUXURY EXPERIENCE

Professional Stretching Techniques

By blending the Real Pro Ultra functions with full-body air cell coverage, the MA73 delivers an impressive suite of stretching movements. These powerfully therapeutic movements (which you'll find in many of the chair's programmed sessions) mobilize the spine, promote relaxation, and help improve flexibility of the lower back, middle back, and neck. Our stretching techniques are perfect for post-workout relaxation or to shake off sleep and stiffness as a morning rejuvenation session.

Full-Body Air Massage

Thirty-three soothing air cells apply compression massage to the shoulders, hips, thighs, buttocks, calves, feet, forearms, and hands. The MA73's extensive air cell array is carefully positioned for maximum benefit and insightfully programmed for maximum relaxation effect. Compression and release are sequenced to faithfully replicate the motions of a real massage therapist.

3D Massage System

With whisper quiet high-performance, brushless motors drive and direct Real Pro Ultra along the X-axis, Y-axis, and Z-axis, offering full freedom of movement in three-dimensional space. As a result, the MA73 is able to switch between massage styles, reach above the shoulders, and soothe every square inch of your back.

Infrared Heated Rollers

Infrared heated massage rollers generate soothing warmth to help relax sore, tense muscles. With heating elements located directly on the massage roller assembly, the MA73 delivers point-specific heat you'd expect to feel from the thumbs and palms of a massage therapist's hands.

Position and Force Micro Processor

The Real Pro Ultra mechanism constantly feeds information back to the chair's Position and Force Micro Processor, adjusting its movements based on this feedback. Precision and responsiveness allow the MA73 to faithfully replicate the intricate kneading movements of a variety of expert massage techniques.

Multiple Massage Actions

The MA73 Real Pro Ultra can perform complex, Junetsu and shiatsu massage movements. Rolling, tapping, kneading, and ultra-slow kneading techniques are also combined in programmed sessions to mimic the touch of human hands, delivering maximum benefit.

Intensity Sensing and Adjustments

All of the massage features of the MA73 can be adjusted from very gentle to very firm. Air cell compression intensity and the roller massage intensity are each independently adjustable. You can even program and save your favorite setting for up to three users.

“I tried several massage chairs and this one literally put me to sleep it was so relaxing. It also looks beautiful and will look great in my living room.”

Sean

“This is the only massage chair that has felt like going to a real massage therapist...This chair is always surprising me with the smoothness of the movements and how much I can control everything. I also love that it’s a great lounger.”

MASSAGE TECHNIQUES

Junetsu Ultra Kneading: A Real Pro Ultra Exclusive

Junetsu Ultra Kneading massage techniques involve tight, spiral movements that quickly and effectively loosen tight muscles. The target zones benefit from increased blood flow and improvement in pliability of muscle fibers. Junetsu Ultra Kneading also does an exceptional job relaxing the neck and shoulders, to help improve mobility, range of motion, and comfort. These techniques are proprietary and exclusive to Panasonic massage chairs.

Shiatsu

Based on traditional Chinese medicine, this Japanese style of massage literally translates to “finger pressure.” As the name suggests, shiatsu massage addresses specific points on the body, often referred to as shiatsu points, pressure points, or acupressure points. The MA73’s body scan in concert with pressure sensing massage heads direct force accurately and firmly on shiatsu points.

Swedish

The Swedish massage style helps to provide overall relaxation and improve circulation, while enhancing physical health and mental well-being. The MA73’s Real Pro Ultra mechanism applies gentle pressure and movements to simulate how a massage therapist uses hands and palms to provide the relaxing movements typical of Swedish massage.

Kneading

Experience the dazzling variety in circumference, speed, and depth of kneading offered by the MA73. From deep kneading therapy to the most gentle of strokes, MA73’s Real Pro Ultra massage mechanism makes it possible to recreate the trained hands of a massage therapist.

Tapping

This motion simulates the sensation of hands percussively or gently tapping the back. Rapid tapping invigorates and revitalizes, while slow tapping can help your mind and body drift peacefully and comfortably in deep meditation.

Rolling

An up-down movement that is as simple as it sounds... that is until you add in the variation of speed, width, and depth that can be achieved by the Real Pro Ultra mechanism. Rolling motions are surprisingly relaxing, and they provide beneficial intersegmental traction and extension to all levels of your back. Regular back mobilization helps promote and maintain the health of spinal discs. The Real Pro Ultra is capable of combining kneading, tapping, and rolling, creating a broad spectrum of sensation.

“After buying the wrong chair with not enough functions I found this. Panasonic chairs are still such great quality and the chair works perfectly. We made the switch and could not be happier.”
